City Hall

*City Council meetings are the 1st and 3rd Tuesday each month, at 6:00PM at City Hall.

*There are vacancies on some of the City Boards and Commissions. Apply at City Hall.

*The next town hall meeting will take place in the Council Chambers at City Hall on Thursday, December 18, 6:00PM. The Citizen Suggested Topic will be the Capital Improvement Plan and other City plans.

*Dates surrounding graduation are filling up fast for renting the Community Center, get your application and deposit in ASAP!

*REMINDER: Pet registration for 2026 is due January 1-March 31. Late fees begin April 1. This is not the same thing as the rabies tag you get at the vet. Proof of rabies vax required.

Registration fees are:

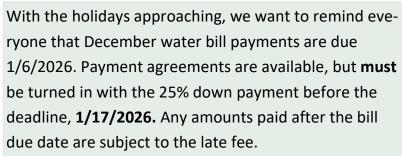

Spayed/Neutered Cat: \$3

Intact Cat: \$6

Spayed/Neutered Dog: \$10

Intact Dog: \$15

Billing

Snow Removal

Please do not blow or push snow into the street when using a snowblower or shovel. This is a safety issue and is against City Ordinance. Residents must clear sidewalks of snow and ice within 24 hours of the completion of a winter event per City Ordinance.

Road Safety, Police Department

As we head into the winter months, the Camanche Police Department would like to remind everyone to take a few simple steps to stay safe on our roadways. Winter driving conditions can change quickly, and even experienced drivers can find themselves in trouble when snow or ice arrives. Please allow extra travel time, reduce your speed, increase following distance, and make sure your vehicle is equipped with proper tires, an ice scraper, and a full tank of gas. It's also a good idea to keep a small emergency kit in your car with blankets, a flashlight, jumper cables, and basic supplies.

The holiday season also brings increased travel and busy schedules, and we encourage everyone to plan ahead and celebrate responsibly. Please avoid drinking and driving, designate a sober driver or use alternate transportation. Officers will be out actively ensuring the safety of our community, and your cooperation goes a long way in keeping our roads and neighborhoods safe for everyone. As always, if you see something concerning, don't hesitate to contact us. On behalf of the Camanche Police Department, we wish you a safe, healthy, and enjoyable holiday season.

My360 App

If you have a water account you can register for the Camanche Water Consumer Portal to view your water consumption and detect possible issues without having to wait for your water bill! Sign up here: https://camancheia.my360-app.com

Camanche Public Library

Camanche Public Library holds many interesting and interactive programs such as three separate book clubs each month, mahjong for beginners, and after-hours adult board game night! There are also weekly programs for children 5 and under. We host an afterschool kids' club 2 Fridays per month at 2:00pm. We are committed to bringing at least one informational program to the library each month that will interest every age group. Please look at our website under the "calendar of events" tab, follow us on Facebook, or check the Clinton Herald Events page to explore what we have for you!

Fire Department

Heating Element Safety Tips:

- **Do **NOT** plug into extension cords or power strips.
- **Keep front, back, top, and sides clear.
- **Do **NOT** leave running when you're not home.

Carbon Monoxide Poisoning Signs:

- **Flu-like symptoms such as headache, dizziness, nausea, fatigue and weakness. (Symptoms typically improve outdoors, and worsen when you go back inside)
- **You may also experience difficulty breathing or confusion.
- **Your pets may also show signs of illness.

Often called the invisible killer, carbon monoxide is an invisible, odorless, colorless gas created when fuels (such as gasoline, wood, coal, natural gas, propane, oil, and methane) burn incompletely. In the home, heating and cooking equipment that burn fuel can be sources of carbon monoxide.

- CO alarms should be installed in a central location outside each sleeping area and on every level of the home and in other locations where required by applicable laws, codes or standards. For the best protection, interconnect all CO alarms throughout the home. When one sounds, they all sound.
- Follow the manufacturer's instructions for placement and mounting height.
- Choose a CO alarm that is listed by a qualified testing laboratory.
- Call your local fire department's non-emergency number to find out what number to call if the CO alarm sounds.
- Test CO alarms at least once a month; replace them according to the manufacturer's instructions.
- If the audible trouble signal sounds, check for low batteries.
 If the battery is low, replace it. If it still sounds, call the fire department.
- If the CO alarm sounds, immediately move to a fresh air location outdoors or by an open window or door. Make sure everyone inside the home is accounted for. Call for help from a fresh air location and stay there until emergency personnel declare that it is safe to re-enter the home.
- If you need to warm a vehicle, remove it from the garage immediately after starting it. Do not run a vehicle or other fueled engine or motor indoors, even if garage doors are open. Make sure the exhaust pipe of a running vehicle is not covered with snow.
- During and after a snowstorm, make sure vents for the dryer, furnace, stove, and fireplace are clear of snow build-up.
- A generator should be used in a well-ventilated location outdoors away from windows, doors and vent openings.
- Gas or charcoal grills can produce CO only use outside.

FACTS

open the flue for adequate

oven to heat your home.

ventilation. Never use vour

- A person can be poisoned by a small amount of CO over a longer period of time or by a large amount of CO over a shorter amount of time.
- In 2010, U.S. fire departments responded to an estimated 80,100 non-fire CO incidents in which carbon monoxide was found, or an average of nine calls per hour.
